

Changing the Canvas Dashboard to “Card View”

Issue: Some students have their Canvas Dashboard set to “List View”, which they are using as their “To Do” list each day. However, the “List View” only contains courses that have set “due dates” for that day, and is not inclusive of all Canvas courses. Therefore, students should change the Canvas Dashboard setting to “Card View” so they go into each Canvas class daily and avoid the confusion associated with the “List view”.

Step 1: Click on Dashboard in Canvas

Step 2: Click on the ellipsis in the upper right corner of Canvas.

Step 3: Select "Card View" from the drop-down menu.
