**ADM\***

The total number of school days within a given term - usually a school month or school year - that a student's name is on the current roll of a class, regardless of his/her being present or absent, is the "number of days in membership" for that student.

Average Daily Membership (ADM) for each school month is based on the sum of the number of days in membership for all non-violating (NVIO) students in individual LEAs/Charters, divided by the number of days in the school month

(ADM = Member Days (NVIO) / # of days in the school month rounded to nearest whole number). The final Average Daily Membership is the total days in membership (NVIO) for all students over the school year divided by the number of days school was in session.

**ADA\***

Attendance is the presence of a student on days when school is in session. A student is counted as present only when he/she is actually at school, present at another activity sponsored by the school as part of the school's program, or personally supervised by a member of the staff. The total number of days of attendance for all students divided by the total number of school days in a school month gives the average daily attendance (ADA = Daily Present + Daily 1H Abs/20).
