

Welcome to Arcade Game Design!

We are an organization focused on building student made arcade cabinets from the ground up. This year, our club will focus on finishing the game that we started last year, "Achieving Mastery".

Game Creators

You will learn the game design process and create a playable game for the arcade cabinet. You will need to consider:

- learning curve for the game
- sprite creation
- sound design
- gameplay style
- multiplayer functionality
- control panel layout

If this club sounds like you, please sign up to join us!

Please keep in mind that space is limited so only apply if you plan on seeing this project through to its completion.

This year, membership for this club is free.

The software team will meet the 3rd Friday of the month from 2:00 to 3:00. Other times may be scheduled as needed. We will be meeting virtually. You must have a computer at home that can install and run the Epic Games engine and Unreal Engine.

I am interested in joining Arcade Builders!
