Evaluating Teacher Performance

To begin the *Summary Evaluation* process, an evaluator must first determine the appropriate rating for each NCEES element. Within the five NCEES standards, there are 25 elements.

Evaluators identify the element ratings by reviewing **NCEES Observation Scoring Summary** to see the aggregation of all descriptors marked throughout the year. The illustration below represents an example of scoring summary data for the first two elements in Standard I.

Standard I: Teachers Demonstrate Leadership

To determine the correct rating, the evaluator should begin in the left-hand column of each element section and ask the question, "Was everything in this column seen at least once, across all observations?" If the answer is "yes," the evaluator moves to the next column and asks the question again, proceeding accordingly until the column is reached where a descriptor was never checked in any of the observations.

Once this point is reached, the element rating is the column that precedes the "zero" (o).

Evaluating Teacher Performance

At the end of the school year, in addition to identifying the ratings for each of the elements, the evaluator must also determine an overall rating for each of the NCEES Standards during the Summary Evaluation Conference.

At that time:

- Teachers may provide comments and/or additional artifacts to be considered by the evaluator before making the final standard ratings.
- For each standard I-V, the evaluator makes a reasonable assessment, based upon evidence (Considering the element ratings derived from observations, and any/all other relevant information that can help inform the rating of the overall standard).
- Comments should be written as necessary to support/reflect the ratings.
- Teacher signature indicates the observation was shared and reviewed.
- Evaluator signature indicates the observation was reviewed and required evaluation processes were followed.

Example of Scoring the Summary/End-of-Year Rating Sheet

Summary Rating Sheet for Teachers: After compiling observation data, the evaluator can use this sheet to summarize ratings. Then the Summary Rating Form can be completed.	Developing	Profident	Accomplished	Distinguished	Not
Standard I: Teachers demonstrate leadership	2 10			33	100
A. Leads in the classroom	X	- 8		6	38

Evaluating Teacher Performance

To rate each NCEES standard, the evaluator must use all evidence available to make a reasonable assessment of a teacher's overall performance in each of the five areas of the NC Professional Teaching Standards (Leadership, Equity, Content, Instruction, and Reflection).

The teacher evaluation process manual offers the following descriptions of the overall standard-rating categories:

Developing: Teacher demonstrated adequate growth toward achieving standard(s) during the period of performance but did not demonstrate competence on standard(s) of performance.

Proficient: Teacher demonstrated basic competence on standard(s) of performance.

Accomplished: Teacher exceeded basic competence on standard(s) of performance most of the time.

Distinguished: Teacher consistently and significantly exceeded basic competence on standard(s) of performance.

Not Demonstrated: Teacher did not demonstrate competence on or adequate growth toward achieving standard(s) of performance.

Teachers and administrators sometimes report that the performance descriptions above are subjective, inadequate, or confusing. Where more objective rating guidance is necessary to help evaluators reach an informed, holistic rating for each of the five standards (as they review and assess teacher-practice data, evidence, and artifacts collected throughout the year), it is essential to use the structure and language of the NCEES rubric to anchor this decision making process.

The descriptors of practice in the NCEES rubric progress in scope and complexity across the columns from left to right.

Developing	Proficient	Accomplished	Distinguished
descriptors measure	descriptors measure	descriptors measure	descriptors measure
Knowledge	Action	Interaction	Extension

Acknowledging and understanding this progression can help the evaluator objectively reach an overall rating for each standard, for example:

- If the evidence collected throughout the year demonstrates that the teacher simply possessed **knowledge** of the concepts and practices within the standard, then the teacher is **Developing** in that standard.
- If the evidence collected throughout the year confirms the knowledge of concepts and practices described
 above <u>and</u> shows that the teacher took **action** to use those practices in ways that typically created positive
 conditions for success, then the teacher is **Proficient** in that standard.
- If the evidence collected throughout the year confirms the *knowledge* and *action* described above <u>and</u> shows that the teacher facilitated *interaction* that consistently resulted in productive outcomes, then the teacher is **Accomplished** in that standard.
- If the evidence collected throughout the year confirms the *knowledge*, *action*, and *interaction* described above <u>and</u> shows that the teacher *extended* his/her impact by influencing people, processes, and activities in ways that led to measurable positive outcomes at the school, then the teacher is **Distinguished** in that standard.

In situations where formative support is provided to a teacher throughout the year, and the outcomes and evidence available at the time of the summary rating indicate that the teacher still lacks the will and/or skill to demonstrate knowledge of appropriate practices within the standard, then the teacher may be rated **Not Demonstrated**.

Teachers should be strongly encouraged to establish professional development goals, to specifically address any areas rated below the **Proficient** level on a summary rating form, for the upcoming year.
