Dedicated Staff, Involved Parents, & HAWK-tastic Students

CURRICULUM

NTES adheres to North Carolina's Standard Course of Study, which defines the content standards for each grade level. Through varied instructional activities, we deliver a high quality education that is focused on student learning and data driven results. Through remediation and enrichment differentiation, our HAWKS receive instruction and teacher support to reach their learning goals.

PROJECT/PROBLEM BASED LEARNING

Project/Problem Based Learning (PBL) put simply— it's learning by doing. Project Based Learning is a teaching method in which students gain knowledge and skills by working to investigate and respond to an authentic, engaging, and complex question, problem, or challenge, while inspiring students to question actively, think critically, and draw connections between their studies and the real world.

MESSAGE FROM THE PRINCIPAL

Each year, I look forward to working with NTES stakeholders to continue a tradition of excellence in academic and social growth for our students. I continue to be committed to supporting the NTES staff in providing a high quality, standards-based education that is focused on student learning and data driven results.

I encourage you to get involved in our community; everyone has something to contribute. **TIME, TALENT, OR TREASURE!** Your time is a significant investment in student learning and we appreciate the gift of our strong school-home partnership.

We believe that partnerships among the school, home, and community are essential to success. We encourage your involvement in our A+ school.

**A “virtual tour” of our school can be accessed by visiting our website. Select “About Our School” from the top bar, and then “School Profile.”*
