

## Follow Us on Twitter! @WMSINFO

### How to create a Twitter account:

1. Navigate to <http://twitter.com/> and click the **yellow button** on the right hand of your screen, or simply navigate to <https://twitter.com/signup>.
2. Fill in the first field with your **full name**.
3. Select a **username**. Try to pick something that describes you - whether it's a nickname, an interest or a hobby.
4. Enter a **password**. Make sure your password contains letters, numbers, and symbols.
5. Enter your **email address**.
6. Twitter uses your email address to confirm your account before you can finish the signup process. Be sure to enter an email address that you actively use.
7. Once your account is confirmed, log into Twitter and **search for WMSINFO**, and click "**follow**" to begin following us on Twitter.

### How to Receive WMS Tweets via Your Mobile Phone

1. While logged into Twitter, click on "**Set up mobile notifications**" link in right hand column.
2. Enter your mobile number in the correct box and then click the "**Start**" button.

This will bring up a "**Verify**" screen. You **MUST** send a text message to Twitter from the mobile number that you entered on the previous screen. Twitter does not charge for this service; however, standard message and data rates may apply.

3. **On your mobile phone, text to:** 40404 and type in the message: GO

Once Twitter has received your message, a confirmation screen on your computer will be displayed. This screen will allow you to set your preferences for Twitter text notifications.

4. To receive messages from WMS, "**Tweets from people you've enabled for mobile notifications**" option **MUST** be checked.
5. Then click the "**Save**" button at the bottom of the page.
6. Click on the "**Home**" link at the top of the page.
7. In your list of "**following**" in the right hand column, click on **WMSINFO**.
8. In the left hand column, on the right side of the green "**Following**" button, click on the mobile phone button. Once clicked, the mobile phone button should turn green, indicating that you have enabled Tweets from WMSINFO to be sent to your mobile phone.
