

Step 1. Log-in to the website

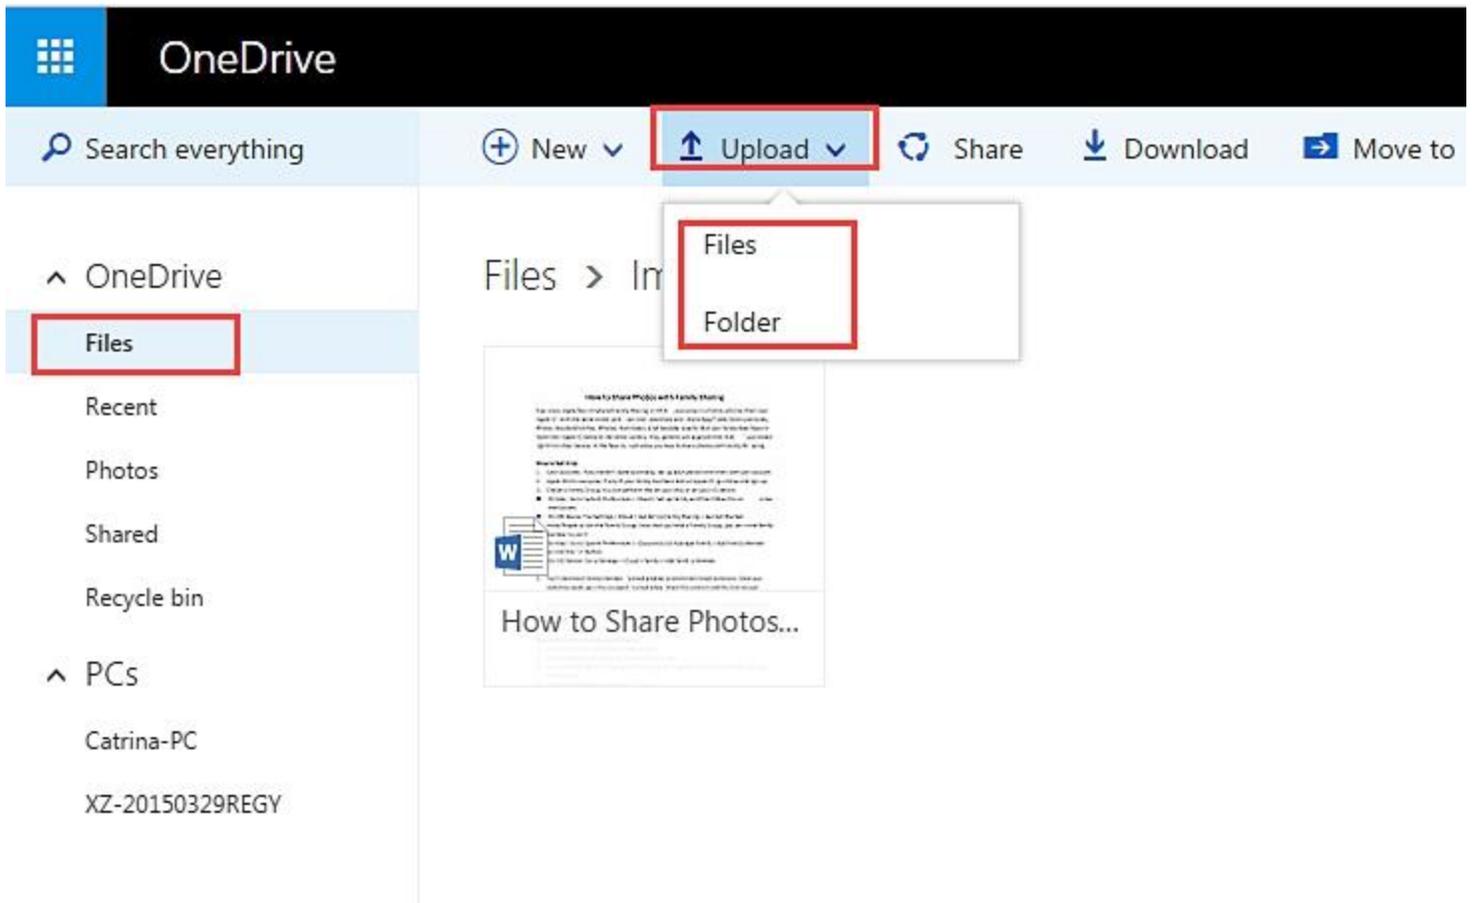

To start with, you need to log-in to OneDrive right [here](#) using the credentials of your Microsoft/live account, linked to your OneDrive. After providing your credentials, you can log-in to OneDrive's dedicated website and access the files that you have already stored.

<https://onedrive.live.com/about/en-us/signin/>

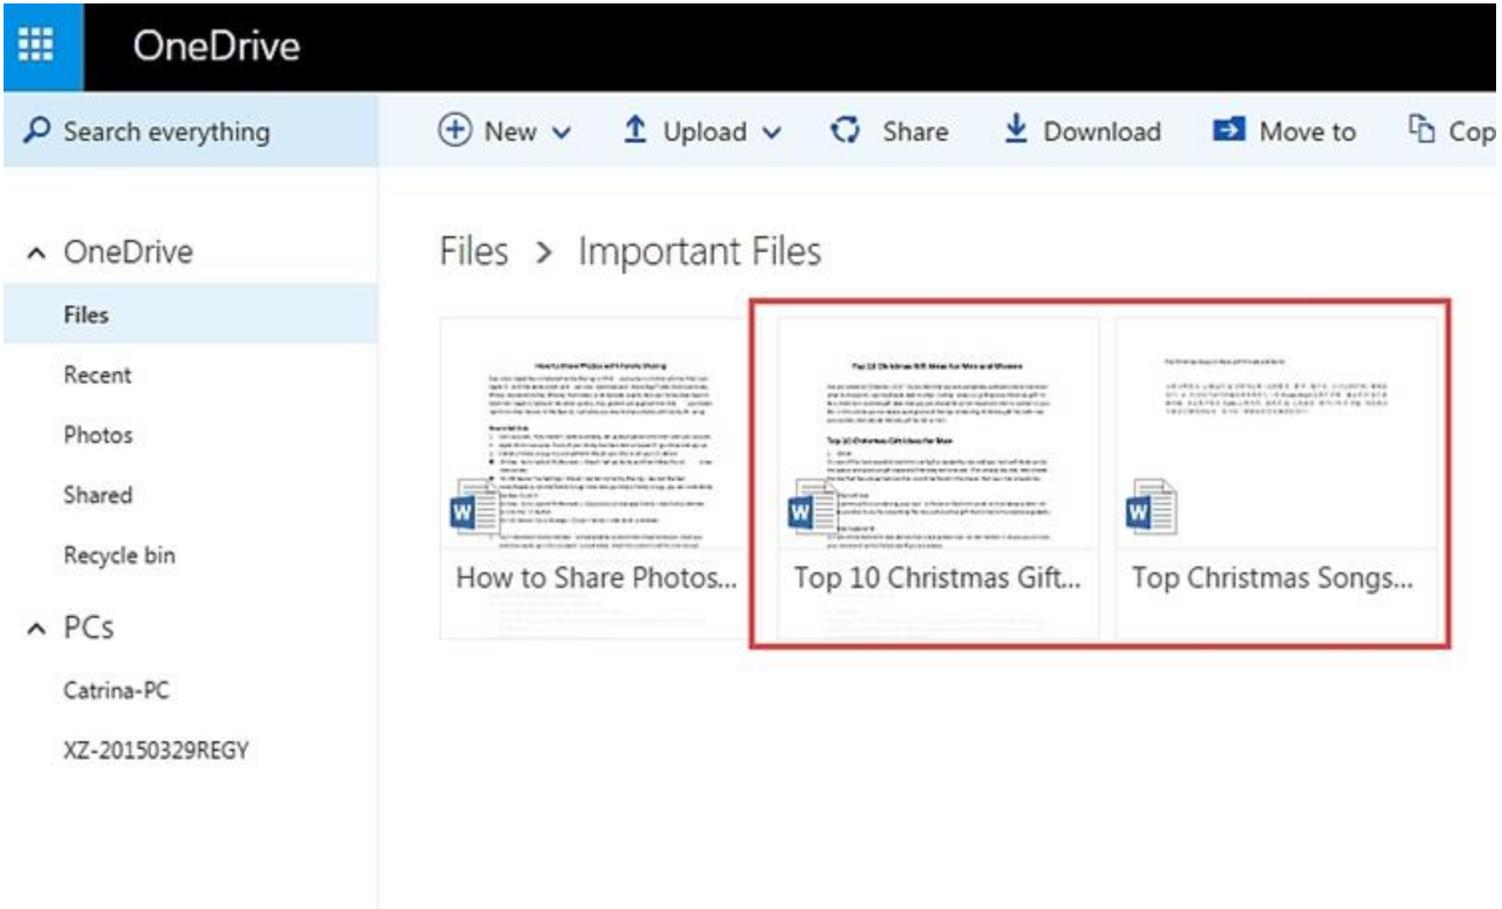

Step 2. Upload files to the cloud

In order to upload a new file to backup PC to OneDrive, click on the "Upload" button on the toolbar. You can either upload an entire folder or can upload the selected files. Simply choose your preferred option. It will open a new browser which can be used to select the files you wish to backup with OneDrive.

Step 3. Complete the backup

After selecting the files you wish to backup to OneDrive, just open them. Wait for a while as your content would be uploaded to the cloud. After uploading the files, you can view them or access them from OneDrive's website without any trouble.

That's it! After following these steps, you would be able to perform Windows backup to OneDrive.
